

5th International course on OPHTHALMIC AND OCULOPLASTIC RECONSTRUCTION AND TRAUMA SURGERY

In-depth lectures and 14 hours of highly realistic
hands-on trainings on the unmodified human tissue

worldwide
unique!

VIENNA, January 08th-10th 2014

Vienna General Hospital / Neurosurgical Laboratory

Hosted by

Univ.-Prof. Ursula Schmidt-Erfurth, MD

Chair of the Department of Ophthalmology, Medical University Vienna

Course directors

Univ.-Prof. Franz-Josef Steinkogler, MD

Former Head of oculoplastic and
lacrimal surgery

Medical University Vienna

Ass. Prof. Stephan Kaminski, MD

Head of cornea bank

Medical University Vienna

Faculty:

Univ.-Prof. Franz-Josef Steinkogler,
MD

Ass.Prof. Stephan Kaminski, MD

Prof. Andreas Kuchar, MD

Prof. Gerald Schmidinger, MD

Wolfgang Geitzenauer, MD

Prof. Birgit Lackner, MD

Dear colleagues,

Franz-Josef Steinkogler

we would like to invite you to the fifth Viennese ophthalmic trauma surgery course in January 2014.

Trauma surgery in ophthalmology is of increasing importance and as trauma is not a scheduled surgery training possibilities are rare. A very limited number of 15 participants will be supplied with in-depth information on anterior segment, eye lid and lacrimal trauma surgery. The goal is to provide the participants with the complex theoretical and practical know-how to perform self-critical and self-sufficient trauma work.

The very successful prior three courses have clearly shown that this advanced training course is sustainable and outstanding due to the special focus on the unique and comprehensive microsurgical hands-on training.

Stephan Kaminski

Take the opportunity to combine state-of-the-art hands-on training with a visit to the wonderful city of Vienna. An attractive social programme will give you the possibility to exchange with colleagues on an international level. We are looking forward to welcoming you personally to this international advanced training course in Vienna.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'F. Steinkogler'.

Franz-Josef Steinkogler

A handwritten signature in black ink, appearing to read 'S. Kaminski'.

Stephan Kaminski

About:

advanced ophthalmic trainings was founded by Mario Szvetits and Helmut Weissmann as an independent company for further education in ophthalmology and is specialised in planning and hosting theoretical and practical (wet-lab) advanced training courses for ophthalmologists, ophthalmic surgeons and medical staff.

Find more information at www.ophtalmictrainings.com and on facebook®. 

5th International course on ophthalmic and oculoplastic reconstruction and trauma surgery

Goal:

Proficiency in the theoretical foundations, the performance of different surgical techniques and the management of complications within complex oculoplastic and reconstructive operations of cornea, sclera, lids and lacrimal system.

Content and programme:

The 3 day course consists of compact lectures which cover the theoretical basics for the following extensive hands-on wet-labs. The main topics are:

- Suturing techniques (corneal, scleral, lid, lacrimal)
- Lid reconstruction (skin grafts)
- Lacrimal reconstruction (silicon ring intubation, bicanalicular intubation to the nose)
- Corneal laceration and perforations
- Scleral rupture
- Keratoplasty à chaud

The microsurgical training modules will be accompanied by theoretical courses. Each participant will have a minimum duration of 14 hours for extensive hands-on surgeries on the human tissue.

The programme of the first day concentrates on the theoretical background. In addition to theoretical lectures, the second and third day focus mainly on intensive practical trainings.

Participants:

This in-depth workshop is addressed to hospital based ophthalmic surgeons and ophthalmologic practitioners to improve their theoretical and practical competence in a unique manner.

Please note: Due to this extraordinary and unique course the number of participants is strictly limited to a maximum of 15 persons.

Approach and method:

The lectures are followed by a step-by-step approach. Assisted with video equipment the course directors will demonstrate live how to perform the adequate surgical procedure before you will work directly on your own human specimen.

A team of medical instructors will respond to your questions taking your individual skills into consideration, give advice and personal assistance.

Employees of advanced ophthalmic trainings will assist you with the surgical equipment. To keep concentration on a high level, several coffee breaks and lunch are included.

Completion:

participants from Austria will receive DFP points. All participants will receive a certificate at the end of the course.

Enjoy your Workshop

The programme

January 8th 2014

13:00 - 13:10	Opening remarks (Schmidt-Erfurth MD, Prof.)
13:10 - 13:20	Introduction and course overview (Steinkogler/aot)
13:20 - 13:40	Statistics of traumatology (Steinkogler)
13:40 - 15:00	Corneoscleral injuries und wound treatment (Kaminski) Keratoplasty à chaud (Schmidinger)
15:00 - 15:30	Basics of Wound Management and suturing techniques (Geitzenauer)
15:30 - 16:00	Coffee and tea break
16:00 - 16:45	Lid reconstruction – basics and techniques (Steinkogler)
16:45 - 17:00	Microsurgical Instruments (Heiss)
17:00 - 18:00	Use of operation microscopes for microsurgical procedures in Ophthalmology (Gradwohl)

January 9th 2014

09:00 - 09:30	Video Session: Cornea surgical technique
09:30 - 12:30	Corneal injuries, PKP - Hands-on Training
12:30 - 13:15	Lunch break
13:15 - 14:00	Lecture: lacrimal system (Steinkogler)
14:00 - 16:30	Lid reconstruction – Hands-on Training
16:30 - 18:30	Free practicing
Afterwards	Social evening at a typical Viennese location with authentic food

January 10th 2014

09:00 - 12:00	Lacrimal system – Hands-on Training
12:00 - 12:45	Lunch break
12:45 - 13:00	Lecture: Posttraumatic Endophthalmitis and Miscellaneous Topics (Geitzenauer)
13:00 - 14:00	Chemical burns (Schmidinger) Transplantation of stem cells (Kaminski)
14:00 - 16:30	Free practicing
16:30 - 16:45	Farewell (Steinkogler/aot)

In order to focus on the individual needs of each participant and to ensure that some surgical procedures could be performed several times the free practicing parts at the end of the second and third day are considered to have „open ends“.

Clinical situations and the work on unmodified human tissue

Self-sufficient and self-critical surgical work is of paramount importance.

The ultimate goal of this unique hands-on advanced training course is to transfer state-of-the-art medical knowledge and practical surgical skills through the knowledge and expertise of leading experts in combination with the extensive direct surgical work on human specimen to reflect clinical procedures and surgical interventions as close to reality as possible.

The surgical trainings are conducted on human tissue that is not preserved or modified in any way and through very special and careful handling ensured to be not older than 24-48 hours.

This guarantees that the haptic difference between the work on the human tissue the participants work on and the work on real patients is – from the surgical point of view – marginal.

As a participant you will experience pressure free true “hands-on” medical knowledge that is simply unique.

Ophthalmic-surgical workstations

Within the comprehensive hands-on parts of the advanced training course you will work in a state-of-the-art medical laboratory with most modern equipped workstations providing every comfort – including master workstations with video transmission.

Each participant will work on her/his own workstation which is fully equipped with:

- Human tissue
- Microsurgical instruments from the renewed manufacturer BROSS Medical (www.bross-medical.com)
- Medical appliances from leading suppliers (e.g. Ethicon®, Bausch & Lomb®, etc.)
- Zeiss® microscope

One single workstation for each participant guarantees you a pure individual hands-on training of a minimum of 13 hours.

- Hosted by:** Univ.-Prof. Ursula Schmidt-Erfurth, MD
- Course directors:** Univ.-Prof. Franz-Josef Steinkogler, MD, Ass. Prof. Stephan Kaminski, MD
- Faculty:** Univ.-Prof. Franz-Josef Steinkogler, MD, Ass. Prof. Stephan Kaminski, MD, Wolfgang Geitzenauer MD
Univ.-Prof. Andreas Kuchar, MD, Gerald Schmidinger, MD, Univ.-Prof. Birgit Lackner, MD
- Location:** Vienna General Hospital (AKH) / Neurosurgical Laboratory
- Date:** January 08th - 10th 2014
- Course language:** English
- Registration:** Via attached registration form or go to www.ophtalmictrainings.com
- Closing date:** November 29th 2013 | Please note: limited number of 15 participants
- Participation fee:** EUR 2.740,-(incl. 20% VAT)
- Dress code:** Comfortable; laboratory clothing will be provided
- Terms:** Participation is subject to available places. The General Terms and Conditions of advanced ophthalmic trainings are valid (available for download at the homepage of advanced ophthalmic trainings).

Impressions of previous courses and participants' comments

„Great course - better than any congress“

„Simply unique, thank you“

„I've never experienced anything similar“

„Thank you for the hints and patience“

Registration – Fax: +43 2243 20 898 15

I hereby register for the „5th International course on ophthalmic and oculoplastic reconstruction and trauma surgery“, January 08th - 10th 2014, Vienna General Hospital, at the participation fee of EUR 2.740,- (incl. 20% VAT):

Male Female

Title:..... Name:..... Surname:.....

Street/Number:..... Zip-Code, City:..... Country:.....

Hospital:..... Department/Function:.....

Phone:..... Fax:.....

E-Mail:..... (to get more information about the course via E-Mail)

This personal registration is binding. Within 3 days after the registration and subject to free places I will receive a written confirmation of my registration together with the invoice and the bank details for the transfer of the participation fee. I will be informed if the training course is already fully booked and if there is an alternative date for this training course. In this case I may disregard my registration.

With my signature I accept the General Terms and Conditions of advanced ophthalmic trainings.
